

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

---

Claim 1 (previously presented): In a computer system having a user interface, including a display and a selection device, a method of displaying an electronic document, the method comprising the steps of:

displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicing a printed paper page;

61 associating navigational functionality with a page number of the immersive reading page, the page number having a corresponding interactive region; and

displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the page number of the immersive reading page, wherein

the navigational functionality associated with the page number is transparent to the user prior to the user selecting the interactive region corresponding to the page number of the immersive reading page.

Claims 2-3 (canceled)

Claim 4 (original): The method of claim 1, further comprising the step of invoking a training mode for teaching the association to a user.

Claims 5-8 (canceled)

Claim 9 (previously presented): A computer-readable medium having stored thereon computer-executable instructions for performing a method of displaying an electronic document, the method comprising the steps of:

displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicing a printed paper page;

associating navigational functionality with a page number of the immersive reading page, the page number having a corresponding interactive region; and

displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the page number of the immersive reading page, wherein

the navigational functionality associated with the page number is transparent to the user prior to the user selecting the interactive region corresponding to the page number of the immersive reading page.

G1  
Claims 10-11 (canceled)

Claim 12 (currently amended): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, further comprising for performing the step of invoking a training mode for teaching the association to a user.

Claims 13-21 (canceled)

Claim 22 (previously presented): The method of claim 1, wherein the electronic document is a book in electronic form and the immersive reading page mimics a printed paper page of a book.

Claims 23-26 [including duplicate claim 24] (canceled)

Claim 27 (previously presented): The computer-readable medium of claim 9, wherein the electronic document is a book in electronic form and the immersive reading page mimics a printed paper page of a book.

Claim 28 (canceled)

G2  
Claim 29 (new): The method of claim 1, wherein the displaying includes displaying only one immersive reading page at a time.

Claim 30 (new): The method of claim 1, further including teaching the association to the user by providing audio indicators.

Claim 31 (new): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, wherein the step of displaying includes displaying only one immersive reading page at a time.

Claim 32 (new): The computer-readable medium of claim 9 having stored thereon computer-executable instructions, for performing the step of teaching the association to the user by providing audio indicators.

Claim 33 (new): In a computer system having a user interface, including a display and a selection device, a method of displaying an electronic document, the method comprising the steps of:

displaying at least a portion of the electronic document to a user as an immersive reading page, the immersive reading page mimicing a printed paper page;

associating navigational functionality with an element of the immersive reading page, the element having a corresponding interactive region; and

displaying another immersive reading page of the electronic document in response to the user selecting the interactive region corresponding to the element of the immersive reading page, wherein

the navigational functionality associated with the element is transparent to the user prior to the user selecting the interactive region corresponding to the element of the immersive reading page.

Claim 34 (new): A computer readable medium having computer-executable instructions stored thereon for performing the method of claim 33.
